Re: Low Power FM

Rodney M. Sprott, FCBA
Administrator

Elizabeth Gibbs Zehnder
Community Coordinator

I am writing in support of the proposed Rulemaking for low power FM radio. Such a service can be very beneficial to communities which are currently underserved or not being served at all. As an inner city church in a very diverse community, we would be able to reach out to persons who are in need. This has more to do with community activities than religion, though that is obviously an integral part of our mission. We would find such radio service to be very helpful and fully support the Commission's efforts to provide this avenue for our community.
